A clarion is a medieval trumpet that had clear, shrill tones. Trumpets were often used to get people's attention when making announcements. We are also using "clarion" in the context of making announcements, as well as being thought-provoking when sharing our information and opinions with those people who are interested in new investment ideas.

Topic: Sector Rotation Part 2

This week, we compare and contrast the performance of the Canadian versus the U.S. market sectors: (1) over the last twelve months, since May 2010; and (2) from the highs for the 2011 year-to-date.

	Canadian Statistics				
	Year Ago	High	Current	Change	Change
	May 21 2010	for 2011	May 20 2011	since Year Ago	since 2011 High
Health-Care	37.14	62.37	60.27	62%	-3%

Stock-of-the-Week

<Will return>

-2-

Looking at the two tables above, there are some similarities between the sub-Indexes of the respective markets, but more differences which, perhaps, is a bit surprising.

1. Year-Over-Year Comparison

Health-Care (+62%) performed much better in Canada than did its counter-part (+24%) in the U.S. In Canada, *Consumer Staples* (+25%) did better than *Consumer Discretionary* (+10%) while, in the U.S., the reverse was true, with *Discretionary* (+26%) performing better than *Staples* (+21%). Canadian *Utilities* (+24%) fared better than the U.S. sub-Index (+18%). Another surprising outcome was that U.S. *Energy* (+38%) out-performed its corresponding Canadian equivalent (+20%).

2. Change From 2011 High Comparison

There was much less divergence in the country sub-Indexes from their respective 2011 highs. The main similarities were in Consumer Staples: Canada (+1%), and the U.S. (-1%); Utilities: Canada (+0%), and the U.S. (-2%); and Health-Care: Canada (-3%), and the U.S. (-2%).

The next table shows the performance of the major Indexes for Canada, the U.S., the U.K., and Japan.

	Market Indexes				
	Year Ago May 21 2010	High for 2011	Current May 20 2011	Change since Year Ago	Change since 2011 High
S&P/TSX Venture	1,453.39	2,287.82	2,031.44	40%	-11%
NASDAQ	2,229.04	2,887.75	2,803.32	26%	-3%
DJIA	10,193.39	12,876.00	12,512.04	23%	-3%
S&P 500	1,087.69	1,370.58	1,333.27	23%	-3%
S&P/TSX Composite	11,521.35	14,329.49	13,652.27	18%	-5%
London FTSE 100	5,062.93	6,105.77	5,948.49	17%	-3%
Tokyo Nikkei	9,784.54	10,891.60	9,607.08	-2%	-12%

Canada's commodity-laden TSX Venture Exchange easily won the race over the last twelve months but, equally, fared the worse when commodity prices collapsed. The Nikkei reflects Japan's national tragedy. On balance, the U.S. Indexes have out-performed the other countries' Indexes, reflecting U.S. recovery hopes. Over the next six months, these hopes had better be realized.
